### DETAILED ACTION

Acknowledgment is made of the amendment filed 1/7/02. Claims pending are 1-17.

Claim 6 has been withdrawn from consideration as directed to non-elected species. Claim 17 has been newly added.

#### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 17 (new) is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 recites the limitation "an effective amount of a cosmetic or dermatological preparation as claimed in claim 13" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim because claim 13 is directed to a *process* for the preparation of the cosmetic composition.

#### *Claim Rejections - 35 USC § 103*

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. The rejection of Claims 1-5 and 7-16 under 35 U.S.C. 103(a) as being unpatentable over Dieing et al. (EP 893117) in combination with either Matsumoto et al. (US 5,603,926) or Tanner et al. (US 5,827,508) is maintained for the reasons of the record. New Claim 17 is rejected over the cited references for the reasons of the record.

***Response to Arguments***

5. Applicant's arguments filed 1/7/02 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., that "the copolymers are suitable for use as sunscreen preparations" and they "enhance the UV protective effects of inorganic UV filters") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation is found in the references. For example, the Matsumoto reference teaches combining cationic polymers with inorganic hydrophobized sunscreens in hair care preparations. See above. One of ordinary skill would have been motivated to employ sunscreens of either Matsumoto et al. or Tanner et al. for hair care compositions of Dieing et al. for their art-recognized purpose and with a reasonable expectation of beneficial results such as improved photostability, chemical stability and

Art Unit: 1616

physical stability of the compositions as well as good UVA protection. Alternatively, it would have been obvious to one having ordinary skill in the art at the time the claimed invention was made to use cationic polymers of Dieing et al. in cosmetic composition of either Matsumoto et al. or Tanner et al. for their art-recognized purpose and with a reasonable expectation of beneficial results such as improved conditioning properties of the compositions.

With respect to the unexpectedly beneficial results such as improved stability and SPF of the claimed preparations, demonstrated in Examples 1 and 2 of the instant specification, it is noted that the polymer used in these examples is different from the elected polymer. The showing of unexpected results must be commensurate in scope with the claimed invention. Further, the Applicant compared two compositions, one of which contained the polymer of interest and the other one did not. However, the Applicant did not compare the compositions of the instant invention with those of the prior art (i.e. Tanner et al. and Matsumoto et al.) with contain different cationic polymers.

### *Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to

Art Unit: 1616

37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
